### ATTENTION: BARBIE!

Being a Red and polled Barbie, naturally RZH Brescia-Red-P VG-88 (photo) is intriguing. Reason why she was a well-followed lot at the Holland Masters Sale in 2012 when she sold for €55,000 as a young calf. Six years later, this Colt-daughter is now owned by Diamond Genetics and De Oosterhof Holsteins in the Netherlands. Jan de Vries (Diamond) comments: 'This week Brescia is being flushed to Jordy-Red – there is still good interest for her embryos around the globe and she has some nice daughters in Switzerland and Italy.'

She is a good milk cow and produced 12,245kg 4.24%F, 3.32%P in her last 305-day lactation.

'Brescia's full-sister is dam of Calbrett Blueprint-PP at Semex and AI interest in Brescia has also followed, with 2 of her sons including DG Banga-RC by Ohare-P at Masterrind and DG Baltimore by Parker-P at CBS/Czech. Also of note is Brescia's O'Kalifdaughter in Switzerland owned by Majoric Holsteins, who was Reserve Junior Champion Red-Holstein at Junior Bulle 2017.
