Photo at the age of 28 months, in the fifth  
month of first lactation

# BRESCIA-Red P

## Great-grand dam of Hokovit TOPRED PP

### ATTENTION: BARBIE!

Red and polled Barbie, RZH Brescia-Red P VG-88 (photo), is naturally very attractive. This was the reason why she was a sought-after lot at the Holland Masters Sale 2012, where she was sold as a young calf for €55,000. Six REDFLOWER years later, this Colt P daughter is now owned by Diamond Genetics and De Oosterhof Holsteins in the Netherlands. As Jan de Vries (Diamond) puts it: "This week Brescia is flushed with Jordy-Red – there is still demand for her embryos, and she has some beautiful daughters in

Switzerland and Italy. She is a good dairy cow and yielded 12,245kg 4.24%F, 3.32%P in her last 305-day lactation." Brescia's full sister is the mother of Calbrett Blueprint-PP at Semex, and the interest of the insemination stations in Brescia resulted in 2 sons in insemination, DG Banga-RC, by Ohare-P, at Masterrind and DG Baltimore, by Parker-P, at CBS/Czech. Also worth mentioning is Brescia's O'Kalif daughter in Switzerland, owned by Majoric Holsteins, the Reserve Junior Champion Red Holstein of the 2017 Junior Bull show.

## **HOKOVIT REDFLOWER PP**

**Photo taken in May 2020 during first lactation  
with on average 35.7 kg daily milk and 7.57% fat + protein**

*KeLeKi*

## **HOKOVITATRED P**

**Photo taken in May 2020**

**third lactation 11,820 kg milk/305 days with 8.38% fat + protein  
VG 87**
